

## DEVELON Displays DL220-7 Wheel Loader at The ARA Show

- DEVELON has been a leading wheel loader brand in North America and continues to provide a robust lineup for a variety of applications.
- The DL220-7 wheel loader now comes standard with hydraulic quick coupler piping to the end of the loader arms and a third spool valve for using a wider range of attachments.

(SUWANEE, Ga. – January 2025) The [DL220-7 wheel loader](#) is part of the 200 size class from DEVELON and is an ideal size for many of today's busy construction job sites. It's on display this week at The ARA Show 2025 in Las Vegas.

Contractors rely on the DL220-7 wheel loader for its productivity, durability, reliability, safety, operator comfort, fuel economy and versatility. Shown with a 3-cubic-yard bucket, the wheel loader is designed for a variety of tasks, including scooping, carrying materials and loading. The machine has a dump height of 9 feet, 3 inches and is available in a high-lift configuration for additional dump height and reach. The optional high-lift dump height is 10 feet 9 inches.

"The DL220-7 is among our most popular wheel loader models because of its versatility," says Bill Zak, DEVELON wheel loader product manager. "It's common for our DL220-7 customers to use the optional hydraulic quick coupler for fast and easy attachment changes. All new -7 Series wheel loaders also come standard with a third spool valve with settable hydraulic flow and a detent function. These expand an operator's ability to use attachments with hydraulic-operated features, including grapple buckets."

A durable box frame provides optimal balance, lifting capacity and load distribution. The frame's articulating design enhances structural rigidity and extends the machine's lifespan. Additional machine features include standard ride control for added comfort, reduced cycle times, higher travel speeds, less material loss and higher productivity when loading and carrying material. The wheel loader's limited slip differential allows the wheel with the most traction to receive the proper torque, providing superior tractive effort and maneuverability in tough terrain.

### Standard Premium Features

Standard premium features for the DL220-7 wheel loader include the following:

- Auxiliary hydraulic spool
- [MY DEVELON fleet management](#) (telematics)
- Rearview camera
- Smart key
- Smart Touch display
- [Transparent Bucket](#) technology
- ZF heavy-duty axles

### Built-in Safety

Safety features for the DL220-7 include a backup alarm, object detection system, optional around view monitor (AVM) camera system, rearview camera, Transparent Bucket technology and more.
