

## FOR IMMEDIATE RELEASE

### LGMG NA Introduces the H1056 Telehandler: Power, Precision, and Versatility for Demanding Jobsites

**The Colony, TX – January 30, 2025** – LGMG NA proudly unveils the H1056 telehandler, marking the company's first entry into the North American telehandler market. This powerhouse is designed for superior performance in the most challenging environments. Engineered to meet the demands of North American jobsites, the H1056 combines cutting-edge features with robust engineering to deliver unmatched productivity and reliability.

#### Key Specifications and Features:

- **Industry Standard Lift Capacity and Reach:** The H1056 boasts a maximum lift capacity of 10,000 pounds, a lifting height of 56 feet 1 inch, and a maximum outreach of 42 feet, making it ideal for heavy lifting and precise placement on construction sites and industrial applications.
- **Enhanced Maneuverability:** Three steering modes, including four-wheel and crab steer, allow operators to easily navigate tight jobsites.
- **Built for Rough Terrain:** With four-wheel drive and industry-standard Dana® limited slip axles, the H1056 excels in uneven and demanding terrains.
- **Operator-Friendly Design:** The ergonomic cab features intuitive controls, multiple load chart placements for quick reference, and a spacious layout to reduce operator fatigue.
- **Durable:** The steel engine cover and advanced boom design ensure durability and lower maintenance costs.

The H1056 is powered by a Cummins® 3.8 T4F engine with 74 HP, providing ample power and complies with North American emissions standards. With a fourth-gear travel speed of 15.5 mph, the H1056 ensures quick and efficient movement across jobsites, reducing travel time and increasing productivity. The telehandler's engine bay is designed with serviceability in mind and allows easy and spacious service access.

Backed by LGMG North America's industry-leading five-year warranty, the H1056 Telehandler delivers exceptional durability and peace of mind, making it a reliable choice for operators and fleet managers alike.
