

**FOR IMMEDIATE RELEASE**

**LGMG M2530E Vertical Mast Lift: Compact Innovation for Precision Work**

**The Colony, TX – January 30, 2025** – LGMG NA announces the M2530E vertical mast lift, a compact and efficient solution designed for confined spaces to work at height. This lightweight yet durable lift offers unparalleled maneuverability and operator-focused features, making it a valuable rental for jobsites with restricted access.

**Key Specifications and Features:**

- **High Reach:** Offers a maximum platform height of 24 feet 7 inches indoors and 19 feet 8 inches outdoors, with a platform capacity of 352 pounds—even when using the standard extension deck.
- **Compact and Agile:** At 55 inches in overall length and 30 inches in overall width, the M2530E is engineered to fit through tight spaces and operate efficiently in confined environments.
- **Leak Containment and Maintenance-Free Batteries:** Equipped with standard AGM batteries and leak containment, the M2530E ensures reliability, reducing maintenance, and promotes cleaner worksites.
- **Extension Deck Included:** The M2530E features an extension deck as a standard inclusion, providing added reach without additional cost.

Backed by LGMG’s industry-leading five-year warranty, the M2530E vertical mast lift delivers peace of mind alongside compact innovation. It is an excellent choice for data centers, warehouses, hospitals, and other applications requiring small footprints in confined spaces.
