

FOR IMMEDIATE RELEASE

LGMG SS2632E Micro Scissor Lift: Compact Power for Tight Spaces

The Colony, TX – January 30, 2025 – LGMG NA proudly introduces the SS2632E micro scissor lift, the ultimate solution for operators working in confined spaces. The SS2632E micro scissor lift is the ideal solution for tight workspaces, offering a compact footprint and lightweight design at just 4,365 pounds, making it easy to maneuver in confined areas.

Key Specifications and Features:

- **Compact Design:** With an overall width of just 31.9 inches and an overall length of 75 inches, the SS2632E is perfect for navigating tight aisles and restrictive areas.
- **Versatile Performance:** It provides a maximum platform height of 24 feet 11 inches indoors and 18 feet 1 inch outdoors, with a load capacity of 500 pounds. It is rated for one occupant for outdoor use or two occupants for indoor use. Operators can drive the lift at full height, increasing work productivity.
- **Leak Containment Standard:** Built-in leak containment comes standard, helping to confine potential hydraulic leaks and help maintain cleaner worksites.
- **Durability and Protection:** Reinforced platform floors and decks, protective sheathing on most hydraulic hoses, and heavier gauge metal enhance durability and reliability. The SS2632E also features sealed AC electric drive and function pump motors for increased performance and protection.

Backed by LGMG's industry-leading five-year warranty, the SS2632E combines durability and advanced engineering, making it an ideal choice for data centers, warehouses, and other indoor or outdoor applications where space is at a premium.
