MAGNI TELESCOPIC HANDLERS UNVEILS INNOVATIVE LINEUP AT ARA RENTAL SHOW 2025, INCLUDING THE U.S. DEBUT OF THE TH 6.19 (3.6)

Las Vegas, NV – Magni Telescopic Handlers, a global leader in rotating and heavy lift telehandlers, is set to make waves at the 2024 ARA Rental Show with the debut of its revolutionary TH 6.19 (3.6) fixed boom telehandler, marking its first introduction in the United States. This groundbreaking model will headline a diverse lineup of machines, including the RTH 13.82 (6.25), RTH 17.115 (8.35), HTH 35.32 (16.10), and TH 12.62 (5,5.19), showcasing Magni's unmatched ability to meet the evolving needs of the rental industry.

TH 6.19 (3.6): Compact Power Redefined

The TH 6.19 (3.6) is the latest innovation in Magni's fixed boom series and makes its U.S. debut at the ARA Rental Show. Designed with compact construction sites in mind, this model delivers an impressive 6,600 lbs. maximum lift capacity, and maximum lift height of 19'. Its compact design, advanced LMI (Load Moment Indicator) technology, and compatibility with multiple attachments make it ideal for demanding applications around various job sites.

RTH 13.82 (6.25): Compact Rotating Telehandler

Combining power and maneuverability, the RTH 13.82 (6.25) is a rental favorite. It features a maximum lift capacity of 13,200 lbs., a maximum lift height of 82', and a maximum reach of 70', making it perfect for vertical construction work in confined spaces. Its 360-degree rotation and compatibility with various attachments make it a highly versatile solution for rental fleets.

RTH 17.115 (8.35): The Ultimate Rotating Telehandler

The RTH 17.115 (8.35) redefines possibilities with its 17,630 lbs. maximum lift capacity, a maximum lift height of 114'6", and a maximum reach of 88'7". This robust rotating telehandler is built for challenging jobs requiring heavy lifting, such as moving concrete forms, rebar, and other heavy materials to unprecedented heights. Its advanced load chart and safety features, also included in all Magni machines, ensure top performance and operator confidence. For rental companies, the RTH 17.115 (8.35) offers unmatched versatility and productivity, making it a high-demand addition to fleets serving construction, infrastructure, and industrial projects.

HTH 35.32 (16.10): Heavy-Duty Performance for the Rental Industry

The HTH 35.32 (16.10) brings exceptional lifting power to the rental market, with a 35,200 lbs. maximum lift capacity, a maximum lift height of 32', and a maximum reach of 16'5". Ideal for applications such as handling precast concrete, bundles of rebar, steel, and other heavy industrial materials, this heavy-duty model is a reliable solution for rental customers needing robust performance.

TH 12.62 (5,5.19): Fixed Boom Innovation

The TH 12.62 (5,5.19) is another standout fixed boom telehandler in Magni's lineup. With a 12,100 lbs. maximum lift capacity, a maximum lift height of 62', and a maximum reach of 46'4", it is tailored for tasks such as moving concrete forms, pallets, and other materials around busy job sites. Its compact design, LMI technology, and superior visibility make it a favorite for rental customers prioritizing safety and efficiency.

Unmatched Versatility and Safety

All Magni models are compatible with a wide range of attachments, transforming them into multi-functional tools, including rough-terrain cranes, forklifts, and aerial work platforms. Additionally, Magni's full-color touch screen with a dynamic load moment indicator ensures operators have complete visibility into load limits, enhancing safety and productivity.

Magni Telescopic Handlers continues to push the boundaries of innovation, offering rental fleets equipment that enhances safety, productivity, and profitability. With a focus on versatile solutions and cutting-edge technology, Magni is the ideal partner for rental companies looking to deliver exceptional value to their customers.
