

FOR IMMEDIATE RELEASE

TAKEUCHI TO EXHIBIT WIDE RANGE OF COMPACT EQUIPMENT AND ATTACHMENTS AT 2025 ARA SHOW, BOOTH 2921

Atlanta, GA (Jan. 21, 2025): Takeuchi-US will bring a broad selection of compact equipment to **Booth 2921** at the America Rental Association (ARA) Show, January 30—February 1, 2025. The ARA Show serves as a comprehensive platform where professionals in the equipment and event rental industry come together to learn, network and discover the latest equipment, products and services.

“The ARA Show is a premier industry event, and the companies exhibiting there represent the ongoing push for innovation and technology in the rental industry,” said Jeff Stewart, president of Takeuchi-US. “The rental market is extremely important to Takeuchi, and we believe our quality equipment can help rental customers get their jobs done quickly and efficiently. And rental dealers can benefit from our comprehensive support and customized marketing resources. When you carry the Takeuchi line, you’re backed by a team that’s as invested in your success as you are.”

Takeuchi will feature their durable and versatile compact equipment outfitted with various attachments, including the new [TB20e](#), a battery-powered compact excavator for sale and rental from their [North American dealer network](#). This excavator is designed to help contractors meet their own sustainability goals without sacrificing the performance and reliability they deserve and expect. Zero exhaust emissions and reduced noise/vibration levels make the TB20e an environmentally friendly, sustainable choice when working or around residential neighborhoods, municipalities, schools and hospitals.

Other excavators on display include the [TB335R](#) and the [TB240](#). The TB335R is a short tail swing compact excavator with a rear overhang of only 3.1” over the tracks, making it ideal for working in tight or confined spaces. It also provides a level of stability rarely found in a short tail swing machine. The TB240 excavator features all-steel construction and a rounded body for improved functionality and visibility. The machine’s reinforced boom is designed to provide greater durability and fewer breakdowns. Experienced and novice operators alike can quickly master the TB240’s advanced multi-function display and precision pilot controls.

Takeuchi will also display two compact track loaders at the ARA Show. The [TL6R](#) features a radial lift loader design that provides greater mid-height reach, bucket breakout and lift arm forces. With a height of 6 feet 5.8 inches and a width of just over 5 feet, the TL6R excels on job sites with height and width restrictions. The [TL8R2](#) compact track loader also offers radial lift, as well as an undercarriage with repositioned travel motors with internally routed drive lines, double- and triple-flange track rollers and a quiet-ride track design for better ride quality.

“We hope that everyone at the ARA Show will take the time to come and meet our team at Booth 2921,” said Stewart. “We’re bringing staff from across the United States, along with product experts from our North American headquarters in Pendergrass, Georgia. We’re dedicated to this market, and we hope rental professionals will visit our booth and learn how Takeuchi equipment can help their customers tackle all their toughest jobs.”

About Takeuchi

Takeuchi is an ISO 9001 certified manufacturer of an extensive line of compact track loaders and compact excavators. Founded in 1963, Takeuchi was the first company to introduce the compact excavator, setting the stage for one of the highest growth product segments ever introduced in the compact equipment market. The compact excavator has become a main line product for both rental and construction/utility companies. Takeuchi continued to lead the compact construction industry with the introduction of the first compact track loader to North America.
