Introducing the Toro® Electric High Lift Ultra Buggy® e2500-THL

A high-lift game changer for rental customers

BLOOMINGTON, Minn. (January 30, 2025) — The construction and demolition industry has a new hero to rent for the job site. Toro’s electric high-lift Ultra Buggy® e2500-THL, debuting at the ARA Show 2025, is the ultimate high-lift solution to revolutionize material handling. Engineered to reach new heights in material handling, the new electric Ultra Buggy e2500-THL boasts the ability to effortlessly dump into a 30-yard dumpster, navigate tight spaces with precision, and operate continuously for up to eight hours on a single charge, all while delivering the reliability and performance rental houses and their customers expect.

“Built to outperform and outlast, the Ultra Buggy e2500-THL is the material-moving powerhouse rental customers have been waiting for,” says Kaitlyn Ingli, product marketing manager at Toro. “Toro is proud to deliver an electric material handling solution designed to help rental customers lift higher, maneuver in tighter spaces, and work for an entire day. Whether for interior demolition, construction or debris cleanup, this unit combines strength, efficiency and ease of use to redefine job site operations.”

The Ultra Buggy e2500-THL does the heavy and high lifting, allowing crews to move materials where they need them — quickly and effectively — the first time. With a carrying capacity of 1,250 pounds at full 76-inch dump height and 12.8 cubic feet volume, it’s ready to take on the most debris-intensive tasks, whether hauling concrete rubble, building materials or trash.

The Ultra Buggy e2500-THL is designed to minimize downtime. Toro’s proprietary HyperCell® Battery System, built specifically for commercial-grade applications, delivers up to eight-hours of runtime, ensuring the machine works as long as a crew does. Plus, with zero engine exhaust emissions, it’s the perfect solution for interior job sites. No interruptions, no compromises — just consistent performance that keeps projects moving forward.

Jobsite safety and morale are top priorities on any jobsite. With this cutting-edge electric buggy, your rental house can offer customers reduced physical strain, the ability to avoid repetitive motion injuries and simply focus on getting the job done efficiently. The reinforced track system

powers through rough terrain and over debris, allowing seamless movement across the site. At the end of the day, crews go home smiling, ready to tackle the next shift.

In an industry where time is money, the Ultra Buggy e2500-THL delivers unmatched value:

- 76-inch Dump Height: Effortlessly dump materials directly into a 30-yard dumpster, saving time and eliminating manual debris handling.
- 31.5-inch Width: Navigate tight indoor spaces, doorways, and hallways with ease.
- Reinforced Tracks: Handle tough terrain and obstacles without breaking stride.
- Low Ground Pressure: Preserve surfaces while maximizing maneuverability on all job types.

Help your customers take their job sites to the next level. Contact Toro today to learn more about the Ultra Buggy e2500-THL.
